

The Shuttle's successful flight lays the foundation for an exciting decade for NASA and an exciting time for everyone interested in space science and exploration. I am especially looking forward to several missions that NASA will undertake through the La Canada Flintridge-based Jet Propulsion Laboratory. As my colleagues well know, I have the privilege of representing JPL and I am a strong supporter of it here in Congress. JPL's missions have consistently generated public support and are a mainstay in NASA's scientific portfolio.

JPL's continued management of NASA's Mars program, which for the last year and a half has brought us the twin Rovers Spirit and Opportunity, has resulted in unprecedented success. In addition, the planned 2007 launch of the Phoenix Mars Scout and the 2009 launch of the Mars Science Laboratory will provide the country with a long-duration science laboratory that represents a major leap in space exploration. Specifically, MSL will collect soil samples and rock cores from Mars and analyze them for organic compounds and environmental conditions that could have supported microbial life in the past.

Through its work at JPL, NASA is also slated to begin two major missions that will give us greater insight into the origins of our universe. The first of these is the Space Interferometry Mission, or SIM PlanetQuest. Scheduled for launch in 2012, SIM will determine the positions and distances of stars several hundred times more accurately than any previous program. This precision will allow us to measure the distances to stars throughout the galaxy and to probe nearby stars for Earth-sized planets. The second mission, the Europa Orbiter, will discover whether an ocean exists beneath the surface of one of Jupiter's most interesting moons. This mission should launch in 2015.

JPL is also poised to conduct a series of missions that will examine Earth and lead to better predictions and understandings of our planet's climate. These missions include the launch of CloudSat later this year; the Ocean Surface Topography Mission and the Orbiting Carbon Observatory in 2008; and the 2009 launch of Aquarius, which will provide the first-ever global maps of salt concentrations on the ocean's surface. These missions will provide valuable insight into our planet's precipitation and weather patterns.

Each of JPL's current and future missions are an integral part of NASA's overall space exploration plan. With JPL's missions and other NASA initiatives, such as the agency's rollout of its new exploration architecture for returning to the Moon, there can be no doubt the next decade will be an exciting one.

In closing, Mr. Speaker, I want to again say that the most recent Shuttle mission is just another example of what NASA is doing right. I am pleased to join my colleagues today in congratulating the crew and look forward to another successful Shuttle mission in the near future.

Mr. WELDON of Florida. Mr. Speaker, I rise today with my colleagues to acknowledge the crew of STS-114 in their heroic mission to the International Space Station this past summer. Their mission was watched with awe and appreciation by the entire world. I am proud that so many of my constituents work with NASA and especially the Human Space Flight program.

Great nations explore. America has taken up this banner and has committed itself to

space exploration. We gain so much for our efforts. Space is of such a vital interest to our Nation from an economic and strategic vantage point. The Shuttle *Discovery* and her crew provided a vital support and logistics mission to the ISS. Their mission was an important part of our on-going exploration of space. I thank the crew and all of those who made the mission a success.

We have a wonderful new Vision for Space Exploration that includes a return to the Moon and eventually go onward to Mars. STS-114 played its own small, but critical part in that journey.

Mr. GORDON. Mr. Speaker, I rise today to honor the brave astronauts of STS-114, Space Shuttle *Discovery*. These astronauts, and the entire NASA team, should be very proud of their accomplishments.

The long hours of training and preparing paid off in the nearly flawless execution of multiple spacewalks and many other critical tasks on this mission, including delivering much needed supplies to the space station and performing unprecedented in-flight repairs.

Americans all across this country were riveted by the adventures of these men and women. In fact, there was so much interest that new internet records were set: more than two-and-a-half million people visited NASA's website over the course of this mission.

Many of those "hits" were children, tomorrow's explorers, who have found new heroes and role models in the crew of STS-114. By showing our children what they can accomplish, these astronauts inspire the next generation and encourage them to focus on science, engineering and technology—fields that are vital to our future economy and security.

The ability to inspire is, perhaps, the greatest benefit of our space program and this *Discovery* crew has provided inspiration for all of us.

It is fitting that we honor the crew of STS-114 and all of the NASA employees and contractors who are helping this Nation explore space. I thus am proud to be an original cosponsor of H. Res. 441, and I urge its adoption.

Mr. UDALL of Colorado. Mr. Speaker, heroes are those select few among us who are endowed with courage and strength, those who risk life and limb to further a cause greater than themselves. I rise today to honor seven such heroes, the astronaut crew of STS-114.

These men and women should be very proud of what they accomplished on this historic mission. Through their bravery and ingenuity they helped bring our manned space program back to life. After two-and-a-half years on the ground, we have finally returned to space to continue our exploration into the unknown.

Though our shuttle program still faces many challenges in the months and years to come, we are taking time today to acknowledge the progress NASA has been made thus far. I would like to thank those responsible, not just the astronauts, but the entire NASA team, thousands of dedicated men and women at NASA centers across the country, for their commitment.

In honoring the astronauts of STS-114, we should not forget those who came before them. By continuing our exploration of space, this mission continues their legacy. I am sure

that the brave souls who gave their lives aboard the *Columbia* would be very proud of this *Discovery* crew.

Their steps of progress will lead us into the next chapter of human exploration.

Thank you and I urge members to suspend the rules and pass this resolution.

Mr. AL GREEN of Texas. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. CALVERT. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. CALVERT) that the House suspend the rules and agree to the resolution, H. Res. 441.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. CALVERT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until approximately 6:30 p.m. today.

Accordingly (at 4 o'clock and 29 minutes p.m.), the House stood in recess until approximately 6:30 p.m.

□ 1830

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. SIMMONS) at 6 o'clock and 30 minutes p.m.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings will resume on motions to suspend the rules previously postponed.

Votes will be taken in the following order:

H.R. 3761, by the yeas and nays;

H. Res. 441, by the yeas and nays.

FLEXIBILITY FOR DISPLACED WORKERS ACT

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 3761, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Louisiana (Mr. BOUSTANY) that the House suspend the rules and pass the bill, H.R. 3761, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 400, nays 0, not voting 33, as follows:

[Roll No. 476]

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. SIMMONS) (during the vote). Members are reminded they have 2 minutes remaining in which to cast their votes.

□ 1851

Mr. PAUL changed his vote from “nay” to “yea.”

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ANNOUNCING THE BIRTH OF JACK KEVIN BARTON

(Mr. BARTON of Texas asked and was given permission to address the House for 1 minute.)

Mr. BARTON of Texas. Mr. Speaker, we have had some catastrophes the last several weeks in our great Nation, but there is some good news. I am proud to report that the Sixth District of Texas has a new voter, at least in 18 years.

Jack Kevin Barton was born to my sweet wife, Terri, last Thursday evening at 7:06. He weighs 10 pounds, 4 ounces. He is in good health and is politically unaffiliated.

CONGRATULATING NASA AND THE “DISCOVERY” CREW

The SPEAKER pro tempore. The pending business is the question of suspending the rules and agreeing to the resolution, H. Res. 441.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. CALVERT) that the House suspend the rules and agree to the resolution, H. Res. 441, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 401, nays 0, not voting 32, as follows:

[Roll No. 477]
